Entities > Work > access point for work

access point for work

Definition and Scope

An appellation of work in natural language that is taken from a vocabulary encoding scheme or is constructed using a string encoding scheme.

Element Reference

Prerecording

An access point may be categorized as:

- Work: authorized access point for work
- Work: variant access point for work

An access point not chosen as an authorized access point may be recorded as a variant access point.

OPTION
Include a value that is based on Manifestation: access point for manifestation for a manifestation that embodies a work.

Customization

Use URLs for options, recording methods, elements, etc. to create ‘my Toolkit’ for local applications

Facilities for customizing the RDA Toolkit include:

- User-supplied documentation
  - Bookmarks, notes, documents
- Policy statements [under construction]
- Application profiles [under construction]

Practical tools

New RDA Toolkit is a comprehensive set of tools for creating well-formed interoperable metadata for library and cultural heritage collections

- Instructions for data values
- Elements and entities for data recording
- Choice of granularity (general vs specific)
- Choice of recording methods
- Modular customization
